

SS-MELSM vs Two-stage HLM

Study 1: Main simulation

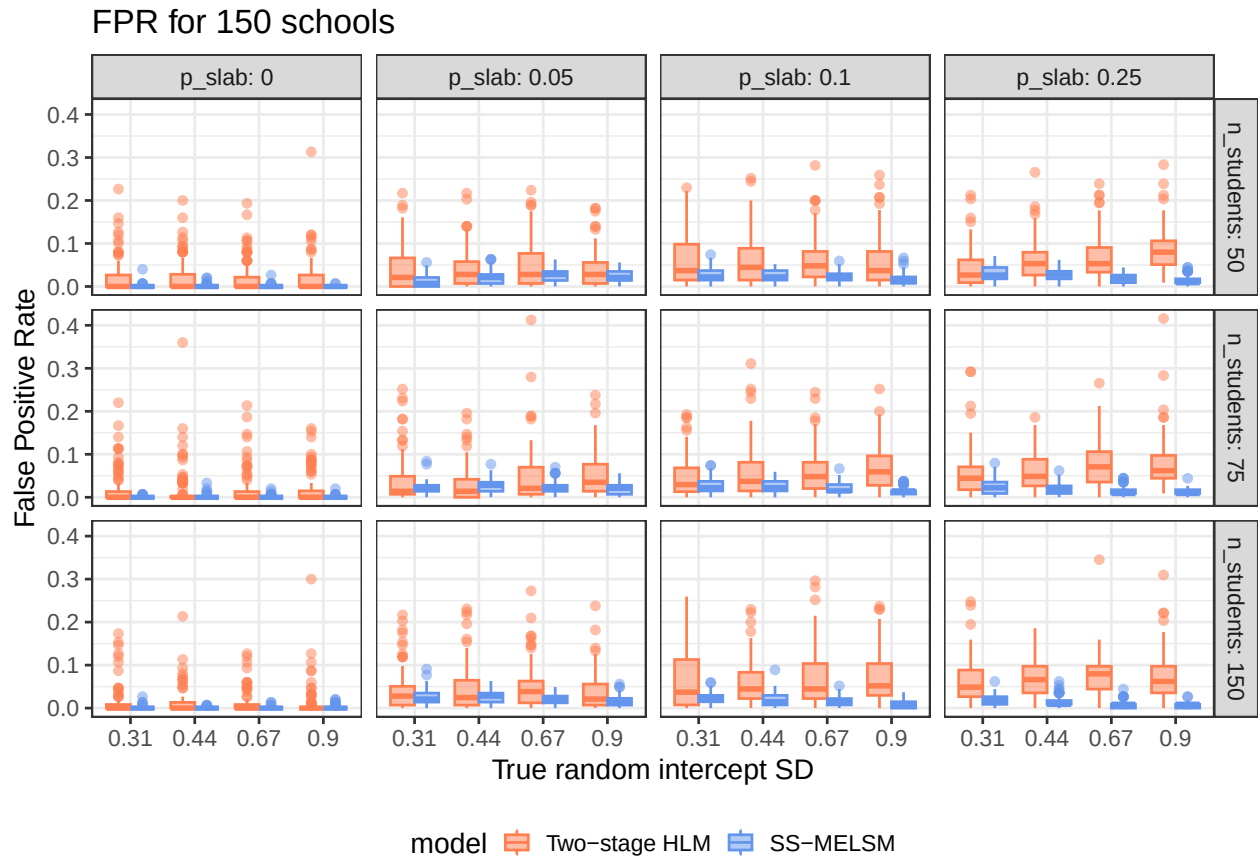

Marwin Carmo

Uncorrelated random effects ($\rho_{u_0t_0} = 0$)

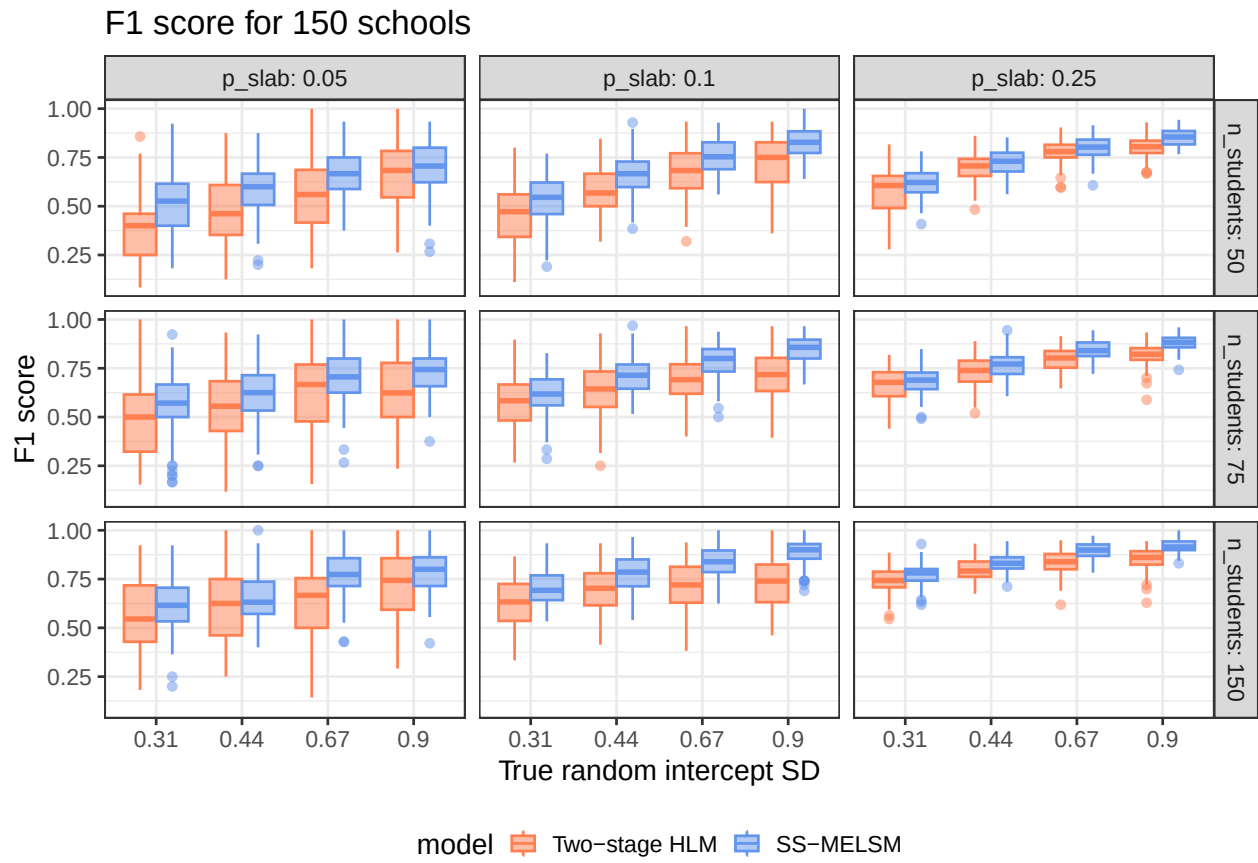

True Positive Rate (Sensitivity)

False Positive Rate (Specificity)

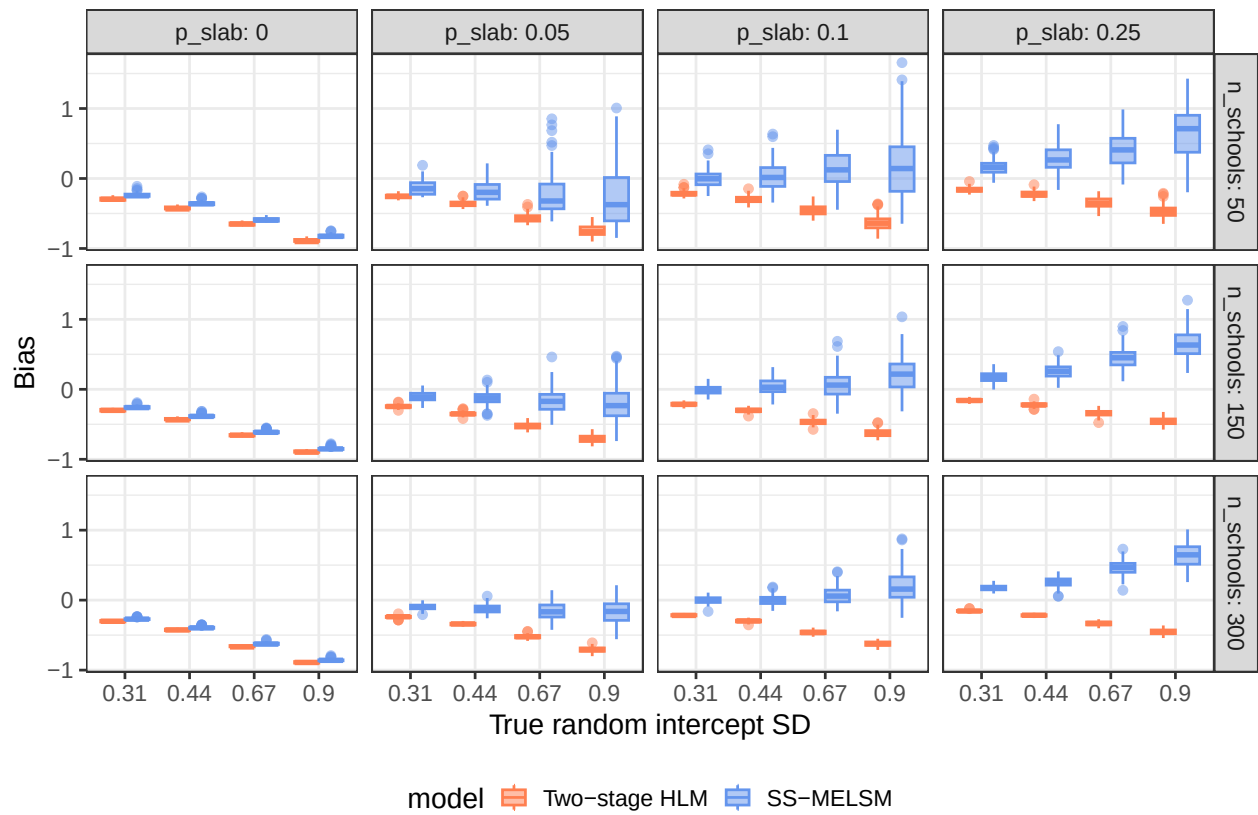

F1 score

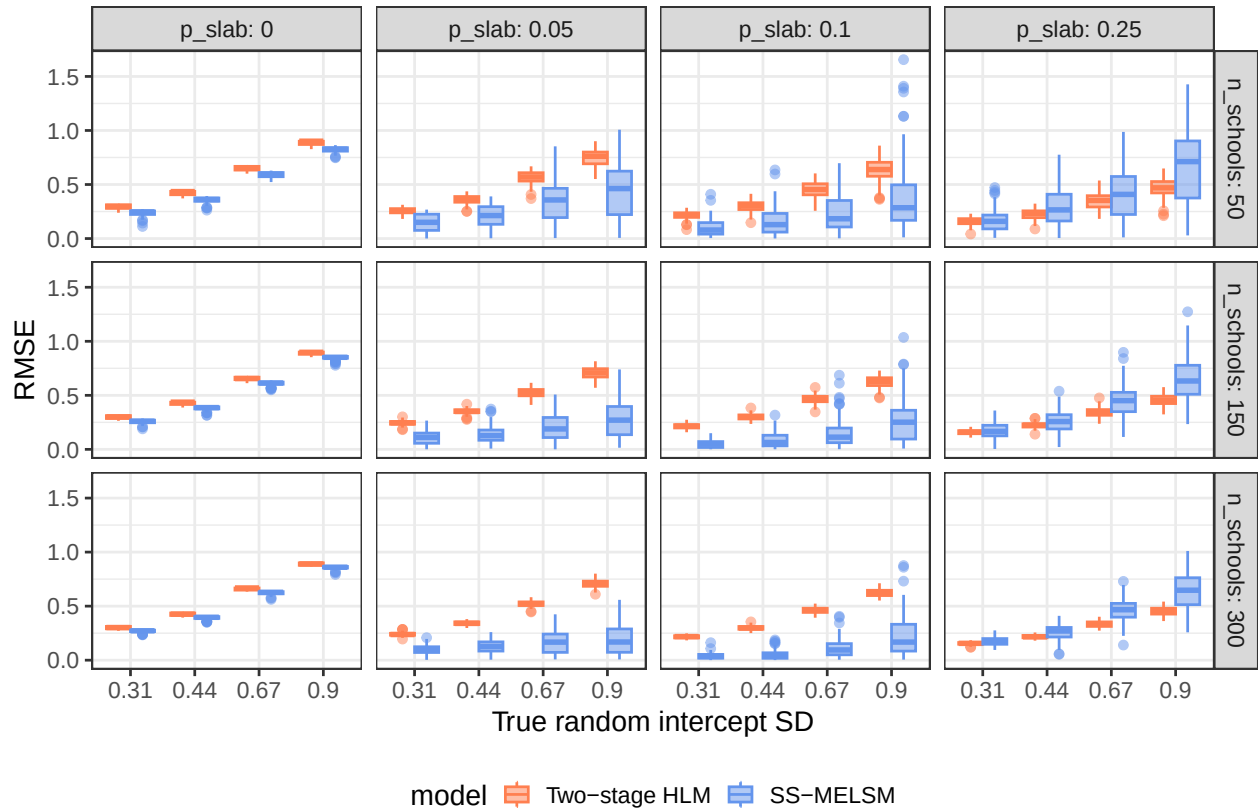

Bias

Bias for 75 students

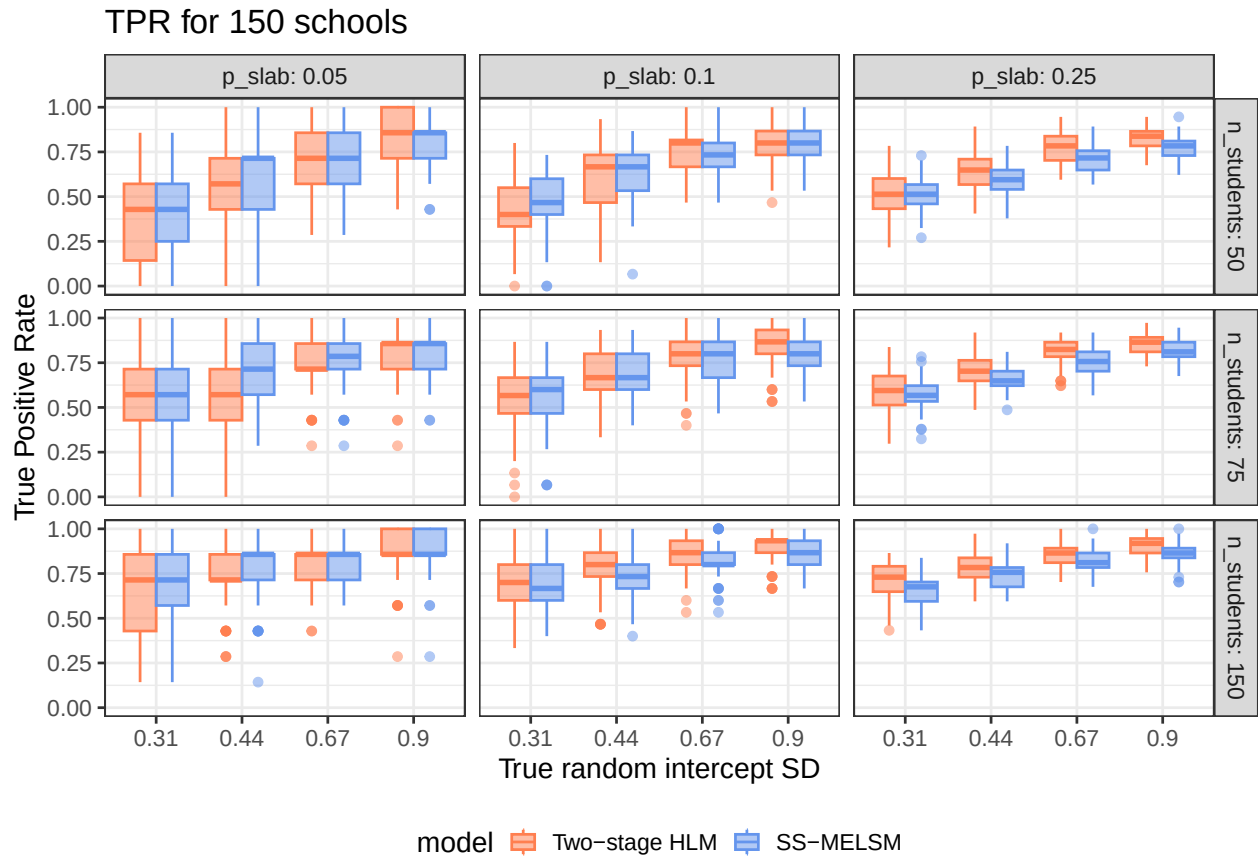

RMSE

RMSE for 75 students

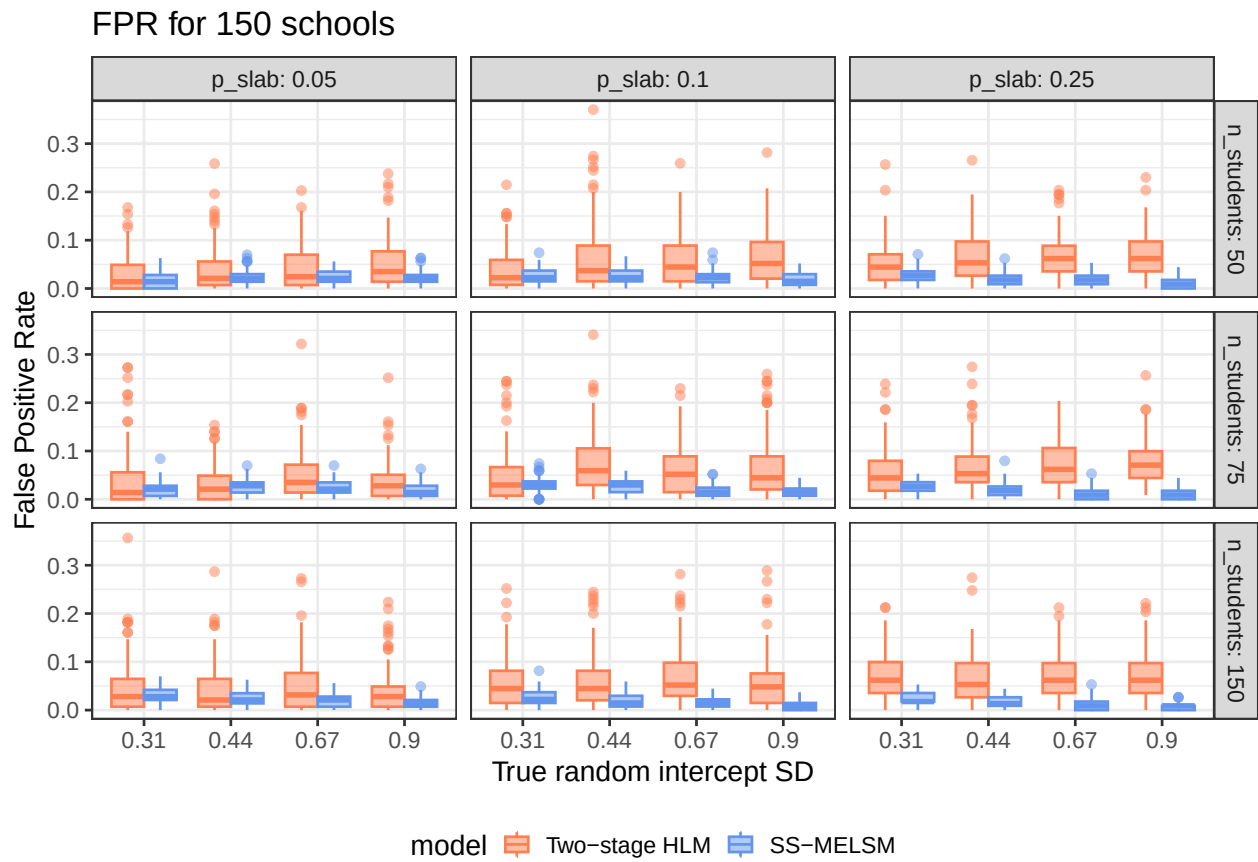

Correlated random effects ($\rho_{u_0t_0} = 0.5$)

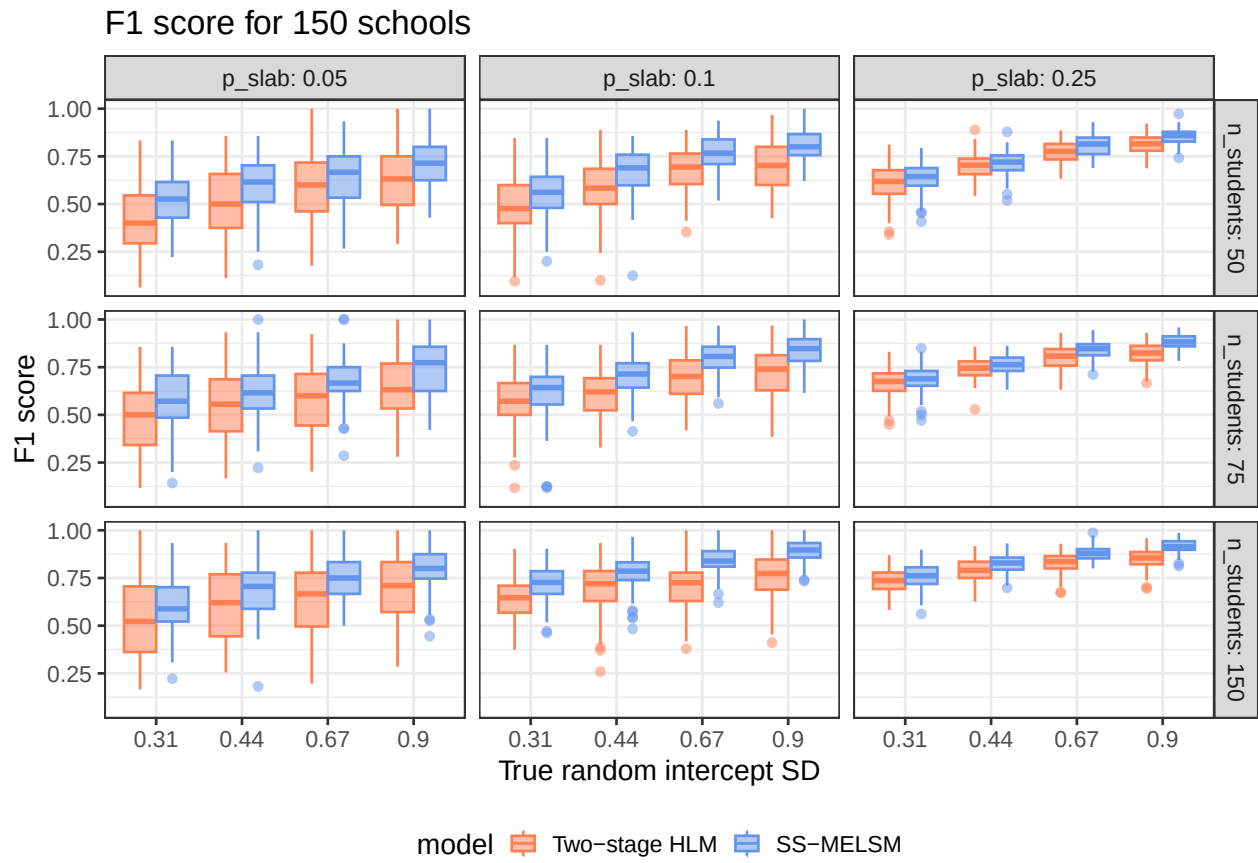

True positive rate (Sensitivity)

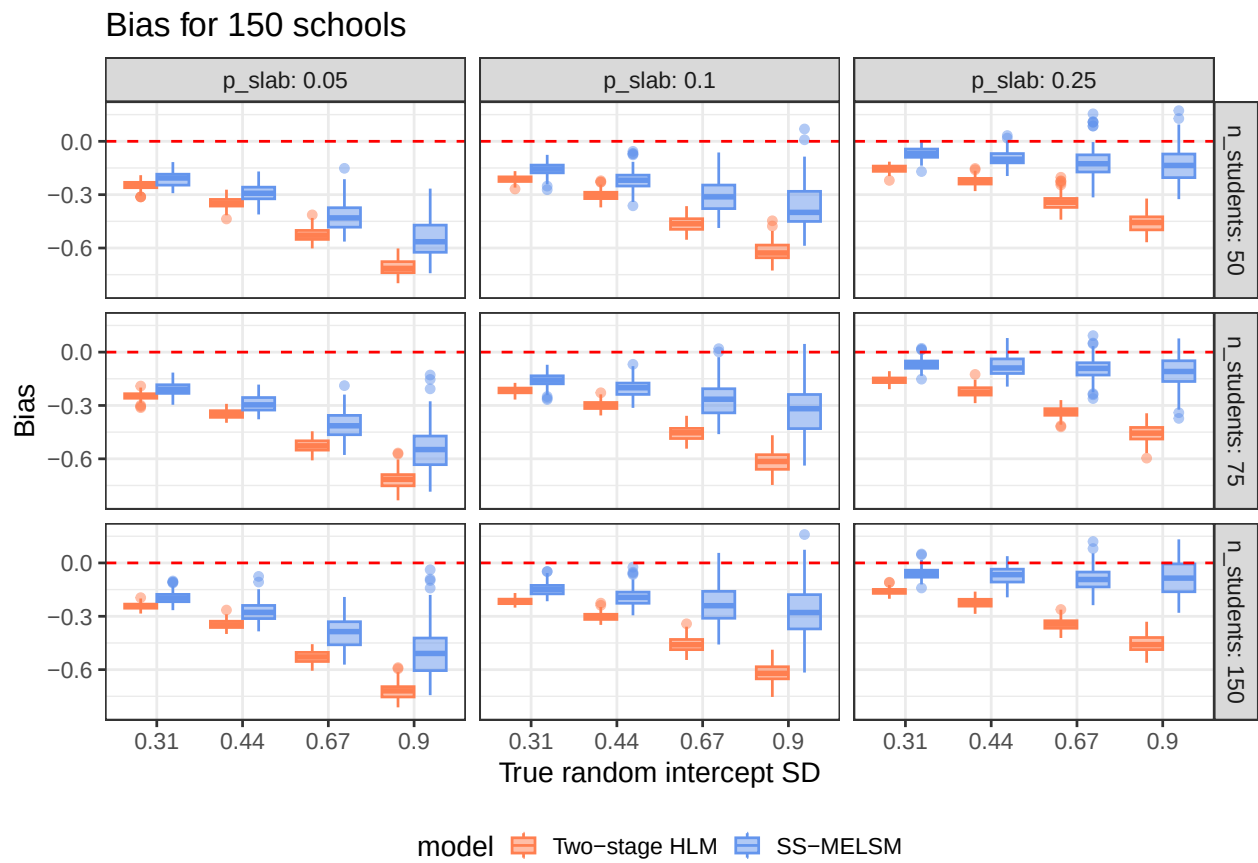

False positive rate (Specifitiy)

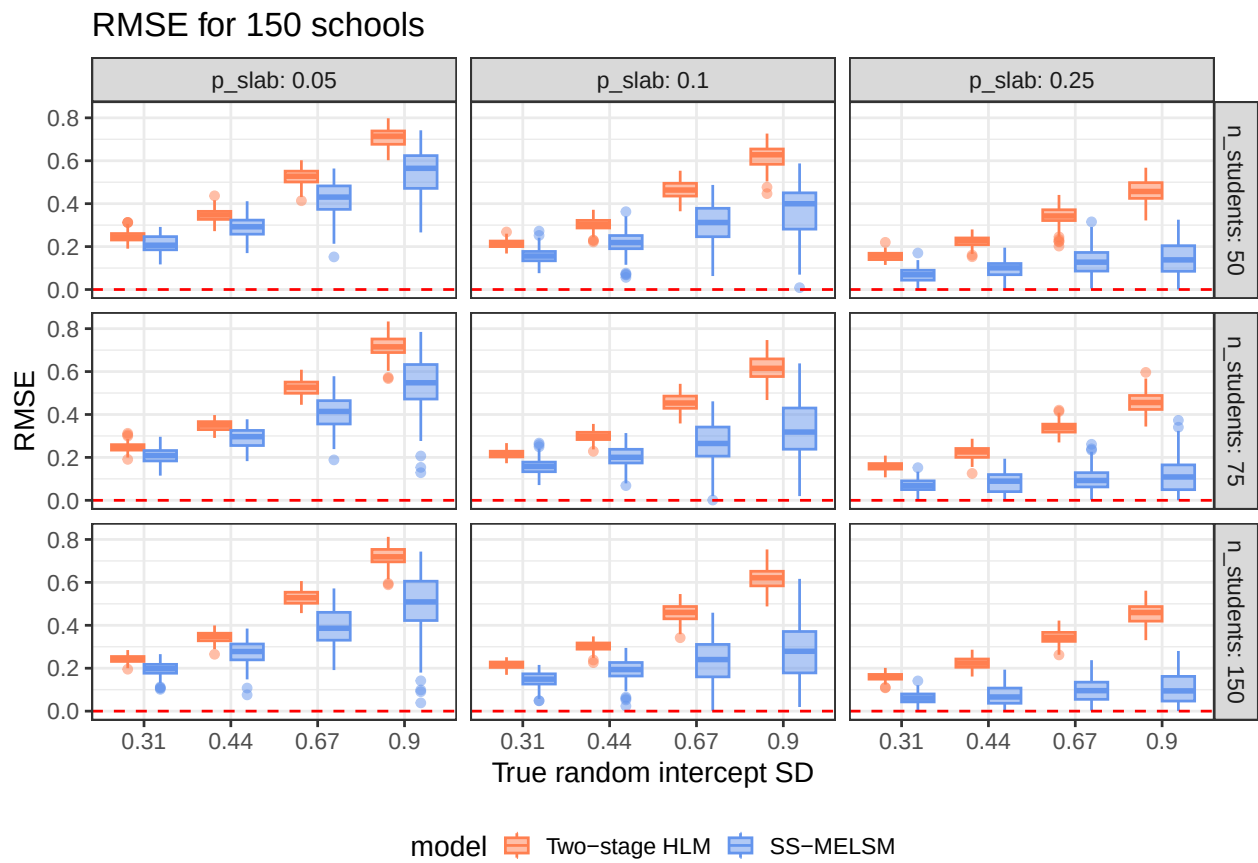

F1 score

Bias

RMSE

Estimated correlation coefficient

Correlation between location and scale random effects
for 150 schools
